In the following passage at certain points you are given a choice of three words marked (a), (b) and (c), one of which fits the meaning of the passage. Choose the best word out of the three. Mark the letter, viz., (a), (b) or (c), relating to this word on your Answer Sheet. Examples K and L have been solved for you.

Passage 5

It is not luck but labour that makes men. Luck, says an American writer, is ever waiting for something to turn up; labour with keen eyes and strong will always turns up something. Luck lies in bed and wishes the postman would bring him news of a legacy; labour turns out at six and with busy pen and ringing hammer lays the foundation of competence. Luck whines, labour watches. Luck relies on chance; labour on character. Luck slips downwards to self-indulgence; labour strides upwards and aspires to independence. The conviction, therefore, is extending that diligence is the mother of good luck; in other words, that a man's success in life will be proportionate to his efforts, to his industry, to his attention to small things.

(d) there is no worker who works so hard as the labourer who begins his day at six in the morning

Passage 6

The avowed purpose of the exact sciences is to establish complete intellectual control over experience in terms of precise rules which can be formally set out and empirically tested. Could that ideal be fully achieved, all truth and all error could henceforth be ascribed to an exact theory of the universe, while we who accept this theory would be relieved of any occasion for exercising our personal judgement. We should only have to follow the rules faithfully. Classical mechanics approaches this ideal so closely that it is often thought to have achieved it. But this leaves out of account the element of personal judgement involved in applying the formulae of mechanics to the facts of experience.

108. The purpose of the exact sciences is to

- (a) form opinions about our experience
- (b) formulate principles which will help us to exercise our personal judgement
- (c) assert our intellectual superiority
- (d) make formal and testable rules which can help verify experience

109. An exact theory of the universe is

- (a) not desirable
- (b) improbable
- (c) possible
- (d) yet to be made

110. In exact sciences

- (a) personal judgements are set aside in favour of a mechanical theory
- (b) one does not find answers to all questions and problems
- (c) one reposes faith in actual experience
- (d) one interprets the universe according to one's wish

111. Classical mechanics

- (a) has formulated precise rules based on experience
- (b) has gained intellectual control over the world
- (c) has formulated an exact theory of the universe
- (d) just falls short of achieving intellectual control over experience
